

Financial Fitness Stable IP Fund of Funds

Minimum Disclosure Document (MDD)

September 2023

Fund Objective

The fund is a conservative multi-asset class portfolio with low equity exposure which will typically not be greater than 40% or the limit allowed by the relevant industry classification. The objective of the portfolio is to provide investors with stable medium to long-term capital growth from a conservative portfolio that maintains a low risk profile, whilst preserving capital.

Fund Universe

The portfolio will invest in participatory interests of underlying portfolios which provide exposure to a spectrum of equity, bond, non-equity and property markets. These underlying portfolios may have exposure to financial instruments. The asset allocation in the portfolio will be actively managed and the assets will be shifted between the markets and asset classes to reflect changing economic and market conditions. The Manager will be permitted to invest on behalf of the portfolio in offshore investments as legislation permits.

Manager Commentary

Which job is harder? Managing the SA Rugby Team or an SA Multi Asset Fund? I can think of many plausible reasons why this not a flippant question. For example, they are both heavily influenced by local and international politics and subtle "team" choices can create significant differences in performance. Therefore, owning an accurate crystal ball is always useful.

2023 has been a hard year for SA Multi Asset Low Equity Funds and among many reasons, the Grey Listing was a bad start, then our local "Lady R" debacle was a huge negative (for SA Equity & Bond prices) during May, followed by the US Federal Reserve added its "damper" during the last week of September by declaring that long-term interest rates would have to remain "higher for longer". This despite most inflation data indicators being on a clear downward path. Since the "Fed" was very slow to react to the threat of inflation; shooting the USA economy in one foot; they now seem to think that shooting the economy in the other foot is a clever way to even things up! I'm guessing that you can spot some sarcasm in the last sentence.

So, for SA Equity and Income, it's been a hard 9 months and a pretty awful 3 months. This fund has significant exposure to SA Equity and Bonds, then Offshore Equity & Bonds. These are all, to a greater or lesser extent, influenced by US Federal Reserve announcements, which have lead many risk averse investors to think that earning 5% on US Treasury Bills is their best bet in very uncertian times. This may be a short-term solution but not a long-term answer. The end result is that this Fund's Portfolio has only gained around 7.56% for the past 9 months and declined -0.3% for the past 3 months.

Most "experts" are convinced that the Consumer Price Index will continue declining, and that 2% to 3% USA inflation will become a reality during the first half of 2024. If and when that happens, the US Federal Reserve will have to drop rates almost as quickly as they raised them. That will push our Reserve Bank to follow, and the very high yielding SA Bonds and low PE SA Equities will be repriced upward. So, looking into the crystal ball, we can see what will happen, but we cannot exactly say when. Maybe managing an International Rugby Team would be easier!

Disclaimer and Disclosures

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the manager. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager retains full legal responsibility for the Fund, regardless of Co-Naming arrangements. Transaction cut off time is 14:30 daily. Each portfolio daily as the portfolio during arrangements. Transaction cut off time is 14:30 daily. Each portfolio during any be closed for new investments. Valuation time is 15:00 (17/100 day quarter end) and 20:00 for fund of funds and certain funds with significant investments in CIS. Prices are published daily and available newspapers countrywide, as well as on request from the Manager. IP Management Company (RF) Pty Ltd is the authorised Manager of the Scheme – contact 021 673 1340 or clientservices@ipmc.co.za. Standard Bank is the trustee / custodian – contact compliance-IP@standardbank.co.za. Additional information including application forms, the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from clientservices@ipmc.co.za. IP Management Company is a member of AISSA. A statement of changes in the composition of the portfolio during the reporting period is available on request. The performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The fund is invested in portfolios of collective investment schemes that levy their own charges, and which could result in a higher fee structure for the fund of funds.

The portfolio may include foreign investments and the following additional risks may apply: liquidity constraints when selling foreign investments and risk of non-settlement of trades; macroeconomic and political risks associated with the country in which the investment is made; risk of loss on foreign exchange transactions and investment valuation due to fluctuating exchange rates; risk of foreign tax being applicable; potential limitations on availability of market information which could affect the valuation and liquidity of an investment. All of these risks could affect the valuation of an investment in the fund.

The total expense ratio (TER) was incurred as expenses relating to the administration of the financial product. Transaction costs (TC) relate to the buying and selling of the assets underlying the financial product. Total Investment Charge (TIC) is the value of the financial product incurred as costs relating to the investment of the financial product. A higher TER does not necessarily inply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts the financial product returns. It should not be considered in isolation as returns may be impacted by may other factors over time such as market returns, the type of financial product, the investment decisions of the investment manager and the TER.
